

Project 1 - Investigating the effect of Sanctions and exchange rate jumps

Development I (Industrial policy)

1. Project

Sanctions and exchange rate jumps (for political reasons) have had different effects on Iran's industries in the last few decades. In this project, you are asked to examine the effect of these two issues on different product groups (imported goods, exported goods, goods that have imported raw materials, and goods not related to the exchange rate). You have to focus on a group of goods or sectors which has all the mentioned features. And you can make use of any method and software you like.

2. Essay question

What was the effect of exchange rate jumps and sanctions in other countries? How much of the effects of exchange rate jumps and sanctions on Iran's economy is the result of the interactions of the real sector of the economy? (500 words)
